OBJECTIVE

I'm a dedicated Full Stack Web Developer, possessing excellent problem-solving, communication, and teamwork skills. My focus is on developing intuitive and user-friendly web solutions that enhance the user experience. I have a deep passion for web development and design and always welcome new challenges.

EXPERIENCE

Pharmacy Technician

2021 — Present

Filing and entering prescriptions, managed patient databases.

- Improved features related to user profiles
- Mentored peers on how to use the database

EDUCATION

Univeristy of Texas at Arlington, Computer Science, Bachelors of Science 2019 — Expected 2023

Selected Coursework: Object-Oriented Programming (C++/Java), Discrete Structures, Algorithms and Data Structures, Operating Systems, Database Systems and File Structures, Artificial Intelligence

Harvard University

2022

- CS50 Introduction to Computer Science (online)

Course that covers a range of topics, including algorithms, data structures, programming languages, web development, and computer science theory.

CURRENT PROJECTS

E-Portfolio

[GitHub](#)

- Built an online portfolio visually showcasing frontend capabilities
- Portfolio displays previews of all of my current projects
- Created entirely out of HTML, CSS, and JavaScript

E-Commerce Clone Website

[GitHub](#)

- Created an e-commerce library that showcases books
- Displays web development skills
- Coded entirely with HTML, CSS, and JavaScript

Lab Rats

[GitHub](#)

- Participated in a group project creating a mobile game
- Worked on mobile compatibility as well as mobile interface on android devices
- Coded with C++, C#, and JavaScript

Car Insurance Databank

[GitHub](#)

- Group project where we were required to sort data efficiently and visually display our data
- Used many algortihms to fit each sorting scenario
- Worked on mostly the backend using SQL, MySQL, and SQLite to create our Databank
- Participated in frontend slightly to make final edits using HTML, CSS and JavaScript

TECHNICAL SKILLS

- Frontend: React, NextJS, Javascript, TypeScript, NodeJS, CSS, HTML
- Backend: C, C++, C#, Python, Java, ARM Assembly, Rust
- Tools: Docker, Redis, SQL, MySQL, SQLite, AWS, Jest, Shell, Tailwind
